

How to Purchase and Download Digital Predesigned Pages, Power Palettes and Kits for StoryBook Creator Plus

Go to my CM website: www.mycmsite.com/mbrownell

Go to “Shop Products” and select “Digital Scrapbooking”

Click on “Digital Content Downloads”

Browse and choose which Themes you want to purchase and download

See additional file on website about the different packages available

Once you’ve located the digital package you want then add it to your cart.

View your cart when you are done and proceed to checkout.

An order confirmation that says THANKS FOR YOUR ORDER pops up with your activation codes in it. Print it out and keep in a safe place with your other software. Then close and go to your new email.

Be careful to put in your correct email address because you will receive an email version of the Order Confirmation which will provide links for the download and with an ACTIVATION CODE. **You will need to keep this information for your records, if you should have to reload your Storybook Creator Plus program in the event you should purchase a new computer or hard drive.**

Leave the e-mail open so you can cut and paste your activations codes rather than have to retype them. You will use the download links in the open email to download the kits, predesigned pages, etc., you just ordered.

Click on each link in the e-mail, following is what happens and the steps you need to take to get your download into Storybook Creator Plus:

DOWNLOAD INFO opens (Print the directions so it’s easy to refer back to it as you proceed to install)

The DOWNLOAD box opens. Choose *Save* (not open)

You can put them anywhere, but it’s recommended to put them into the *download* folder (and then go back and delete them after they’re installed) or put them right into their default directory which is *usually* this for XP:

C:\Documents & Settings\All Users\Shared Documents\Creative Memories\Packages

or this for Vista:

C:\Users\Public Documents\Creative Memories\Packages

After you have downloaded everything, then open Storybook Plus

From the HOME Page on SBC Plus go to CM Content (the little box at the top of the page). The box opens listing your contents. Go to the bottom of the box and click IMPORT PACKAGE

Browse to where the packages you have just purchased are located (see the default location above)

Single click to select a package and click OPEN

After it has imported the package, you’ll need to click *Enter Activation Code*.

Go back to the *Thank You for Your Order* email. Now cut and paste the proper code into the box.

Do this for each new digital download you purchased.

You have done it! Now go find some chocolate while proclaiming “I am a Digital Diva” and have FUN with your awesome new software! Thank you.
